

EdgeWave Archive is a cloud-based secure archiving solution that enables quick and easy access, retrieval and storage of emails to provide Office365, compliance, litigation and eDiscovery support. EdgeWave's rule-based archiving combines easy-to-use management tools with granular policy management to assure your archived messages are indexed and easy to retrieve whenever and where ever you need time.

Highlights

Rapid Search and Access

- Access, browse and retrieve archived emails in seconds
- Fast search capabilities with advanced features for eDiscovery

Centralized Policy Management

- Easy to administer and manage

Unrivalled Security and Privacy

- No co-mingling of customer-specific data.
- Data kept in separate data silos.
- Secure data at three levels, physical infrastructure, data encryption, and the application layer.
- All data encrypted using 256-bit AES encryption.

Multi-Platform Support

- Supports major messaging hosted or server platforms including Microsoft Exchange, Office 365, Google, Cisco, and others.

Flexibility

- Cloud-based deployment
- Mobile archive for easy user access
- Offline access

Integrated with MS Office365

- Client plug-in for MS Outlook
- Archive emails for both MS Exchange and Office 365
- Journal archiving for Office 365
- Document and list item archiving for SharePoint

Compliance and Litigation Support

- Archives data in an immutable state to help meet regulatory requirements for SEC, FINRA, NASD, HIPAA, SOX, GLBA, as well as legal evidentiary rules and your internal guidelines
- Litigation support tools
- Centralizing and importing all historical emails
- Legal hold
- eDiscovery

Secure Data Storage

- Email journaling - store copy of message in journal mailbox
- Email stubbing to maximize server storage

Backup and Recovery

- Archived all inbound/outbound emails including public folders
- Scheduled backups

Features

Unrivalled Security and Privacy

EdgeWave Archive secures data at three levels, physical infrastructure, data encryption, and the application layer, to assure that data is always secure in transit and at rest. Our data storage is secured via industry standard encryption. There is never any co-mingling of archived data between customers. At the application layer, we use Secure Socket Layers (SSL) to encrypt all communication between the web browser and the data center, and a processing pipeline that insures performance and data privacy among all customer accounts.

High ROI, Low TCO

EdgeWave Secure Archive has a low fixed cost per user for annual or multiple year subscriptions that makes planning easy. Migrating your data into the cloud allows you to reduce your internal storage and maintenance costs by reallocating or eliminating on-premise or hosted servers. You also avoid compliance fines and fees associated with data loss, while reducing the costs associated with eDiscovery and analysis by leveraging our easy-to-use management interface for early case assessment.

Easy-to-Use

With no hardware to buy or software to install, you can be up and running instantly. The simple and intuitive web-based interface makes set-up easy and rapid search and retrieval is possible by individuals in a personal archive or by authorized users across your entire archive, without burdening your IT staff.

Robust Technology – Fastest Search and Retrieval

EdgeWave Secure Archive uses cloud-compute infrastructure for scalability and reliability. Our unique and differentiated cloud-compute software stack harnesses on-demand CPU and geographically dispersed storage to power archival functions for data ingestion, indexing, search, eDiscovery and export. The EdgeWave system uses map-reduce style parallel processing to search very large data sets in sub-second response times. Parallel processing is only possible with cloud-compute CPU, because of its ability to scale up in real-time. This makes every search experience rapid with no waiting for jobs to complete.

Other EdgeWave Security Services

Email Security

Email Security provides unrivalled email defense against internal and external threats such as spam, viruses, spyware, phishing schemes, identity theft, and other dangerous or offensive content.

Email Continuity

EdgeWave Email Continuity provides an uninterrupted flow of your email stream in case of unplanned or planned shutdown.

Email Encryption

EdgeWave Email Encryption services assure the secure delivery of your email in accordance with your organization's Security Policy, and provides confirmation of message delivery. Comprehensive reporting offers message tracking and an audit trail to support regulatory and other requirements.

Data Loss Protection

This data protection technology analyzes data being sent out of your network to detect private content in data in motion and prevent sensitive and protected data from leaving your company.

Web Security

EdgeWave iPrism Secure Web Gateway is a set-it-and-forget-it secure web gateway solution that provides real time malware defense and the most accurate URL classification using our unique combination of automated intelligence and 100% human analysis.

About EdgeWave

EdgeWave is a leader in the cyber security industry, delivering innovative, effective and efficient email and web security protection for thousands of business and government organizations. Our mission is to mitigate the risks faced in the real world, and support organizations in reducing the cost and complexity of protecting against today's fast-changing security and risk environment.
