

Protection for Office 365

EdgeWave SecureUP is an integrated security service designed to protect Office 365 users, addressing the most critical email requirements. Offered as a cloud-based service, SecureUP bundles advanced email security, continuity, data loss prevention, encryption and secure email archiving – making it easy to use and deploy. SecureUP service bundle is highly integrated with Office 365, from its intuitive client plug-in to archiving and journaling capabilities. *Additionally, EdgeWave offers hybrid and on-prem options for all components.*

Highlights

Advanced Email Security

- Unrivalled email defense against internal and external threats such as spam, viruses, spyware, phishing schemes, identity theft, and other dangerous or offensive content.
- Zero Minute Defense - 100% human reviewed for highest level of accuracy
- Advanced malware detection and prevention
- Granular, centralized policy management
- Lowest false positive rates in the industry

Continuity

- 24/7 access to your emails
- Enabled automatically or enabled via a simple admin check box
- In an outage, users can still read, compose, reply to, forward, and delete messages

Benefits

Integrated with Office 365

EdgeWave provides a highly integrated service for Office 365 that keeps enterprise email and files safe and compliant. Both mail archive and journaling are available for Office 365. All emails and files can be easily accessed via MS Outlook client plug-in for a single, centralized view. Plus, document and list item archiving is available for MS SharePoint.

Email Archiving

- Archived all inbound/outbound emails including public folders
- Automated backup with scheduled jobs
- Retention of email in an unalterable state
- Cloud-based and scalable

Data Loss Prevention

- Comply with government regulations such as HIPAA, PCI-DSS and GLBA
- Content analysis engine analyzes inbound/outbound information to detect private content and policy

Email Encryption

- TLS server-to server encryption
- Park and pull encryption
- Push encryption

Secure Archive for Email

- Easily archive, search, and retrieve emails
- Compliance and litigation support
- Unlimited data storage
- Minimal ten year data retention
- Data export anytime and at no additional cost

High ROI, Low TCO

EdgeWave Secure Archive has a low fixed cost per user for annual or multiple year subscriptions that makes planning easy. Migrating your data into the cloud allows you to reduce your internal storage and maintenance costs by reallocating or eliminating on-premise or hosted servers.

Easy-to-Use

With no hardware to buy or software to install, you can be up and running instantly. The simple and intuitive web-based interface makes set-up easy and rapid search and retrieval is possible by individuals in a personal archive or by authorized users across your entire archive, without burdening your IT staff.

Other EdgeWave Security Services

Web Security

EdgeWave iPrism Secure Web Gateway is a set-it-and-forget-it secure web gateway solution that provides real time malware defense and the most accurate URL classification using our unique combination of automated intelligence and 100% human analysis.

Don't need all the components? Not a problem. EdgeWave offers each critical component individually for ultimate flexibility in selecting the exact solution for enterprises.

About EdgeWave

EdgeWave is a leader in the cyber security industry, delivering innovative, effective and efficient email and web security protection for thousands of business and government organizations. Our mission is to mitigate the risks faced in the real world, and support organizations in reducing the cost and complexity of protecting against today's fast-changing security and risk environment.
