

Overview

November 2018 release adds Incident Response, submitted email quarantine and new layouts for all notifications.

New Features and Enhancements

Email Quarantine

- All submitted email will be removed from the submitter's Inbox and placed in quarantine
- Only administrators have access to the quarantine
- All messages in quarantine have two potential actions that can be applied based on the threat classification
 - Remain in quarantine
 - Restore back to the original folder in the submitter's Inbox
- Submitters will be notified of the action applied via the classification notification email
- Administrators can view submitted email, including the classification and action applied, via the quarantine.

Incident Response

- Based on the submitted message classification, identical copies of the same message can be removed from all
 - other user's Inbox
- Messages are moved from the user's Inbox to quarantine
- All affected users will receive an automated notification informing them of the threat and action taken
- *Incident Response is a separately licensable feature*
 - For pricing information, please contact EdgeWave Sales at sales@edgewave.com or 800-782-3762.

Postdelivery Submission

- One click was removed from the process for submitting an email for review

User/Group Synchronization

- User and group synchronization occur automatically every hour
- Added/removed users are enabled/disabled automatically as necessary

Email Notifications

- All email notifications have a new layout
